I am Oliver Hill, a German alternative medicine practitioner. I was practicing western medicine for quite a long time already when I realized its limits to curing chronic diseases. I studied deeper and ultimately shifted to alternative medicine. Germany has more than 3,000 alternative medicine practitioners.

Alternative medicine has been described as “any various systems of healing or treating disease such as chiropractic, homeopathy, faith healing or therapy, not included in the traditional medical curricula taught in the United States and Britain. It describes treatments which are not orthodox (mainstream medicine) in which its therapies are generally based on the theory that acknowledges and works with the body’s own inbuilt healing mechanisms.

As an alternative medicine practitioner, I have studied and experimented in the past years so many different types of herbs and supplements but nothing has ever sufficed until I encountered **Moringa YSP®** Powder Tea, a dietary supplement made solely from the scientifically proven miracle tree, Moringa Oleifera. Basically I have been prescribing all my patients Moringa ysp Powder Tea in conjunction with other natural products in its original or derivative form depending on the degree or seriousness of the disease. For instance, in case of dengue fever, I prescribed my patient to take only **Moringa YSP®** Powder Tea and apple for three consecutive days after which the patient has recovered without taking any conventional medicine nor admitting to the hospital. I have also proven the effectiveness of the tea in other diseases such as diabetes, hypertension, hepatitis, goiter, arthritis, dermatitis, myocardial cerebral infarction, high cholesterol, body fat, all type of allergies among others. Other than **Moringa YSP®** Powder tea, it is imperative that the patient has the willingness to fight the disease and must be aware of its cause. Most of the people are aware that basically diseases are caused by pathogens and weakness of our immune systems which resulted from various factors, such as nutritional deficiencies, stress, the food we eat and others. But many are not aware that earth wave or electromagnetic wave brought about by the things around us such as television, computers and other electronic appliances causes diseases. There are instances when we are sick because we are surrounded with these things in our bedroom, or sickness is aggravated because of the presence of these things in our bedroom. If earth wave or electromagnetic wave caused us to be sick, we must avoid them otherwise, we will not recover from our sickness regardless of taking **Moringa YSP®** Powder Tea.

In choosing what to prescribe to my patients, there are several factors that I take into consideration. Primarily, its ingredient/s must have scientifically proven nutritional values and prophylactic properties and safe to use. Secondly, its form which is vital and crucial for absorption purposes. It has been significantly proven that absorption is not only faster but better in liquid and while it passes thru our body, nutritional deficiency is easily detected by our built-in body sensors. Third is the processing method. Heat destroys the prophylactic properties and nutritional values of plants, herbs and other naturally derived products. Air drying method has the same effect in addition to heat burn. Exposure to direct sunlight, heat and oxidation contribute to medicinal and nutritional loss. Lastly, the packing system used. Since oxidation contributes significant losses of the supplements’ nutritional and medicinal properties, the package must be oxygen free.

There are many supplements in the market derived from Moringa Oleifera, but I chose **Moringa YSP®** Powder Tea because it highly adopts the important factors to consider in choosing the supplement. It is made purely of dried powdered leaves of the scientifically renowned miracle tree, Moringa Oleifera. It is in liquid form when taken. It is not boiled, air dried nor subjected to extreme and prolonged heat and it is contained and sealed in an oxygen free package.
